

S.A.R.A Model:
Objective
What do you to achieve?

Scanning: Identify & Describe the problem using basic data, knowledge and maps
“What is the problem you are trying to solve?”

Analysis: Using the data and information technology above, dig deeper into the problems and underlying causes.
“Why does the problem exist?”

Response: What are planning to do to solve the problem? Devising a solution and working with and as a community.
“What specific actions will you take?”

Assessment:
What are the measurable outcomes of this project?
What 2-3 outcomes can we expect from this project?
“How will you measure success?”
